## **DETAILED ACTION**

### ***Election/Restrictions***

Applicant's election without traverse of group II (claims 5-13) in the reply filed on 4/8/05 is acknowledged.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 5-13 are rejected under 35 U.S.C. 102(b) as being anticipated by Jung (USPN 6,816,207).

Jung discloses a liquid crystal display, which is divided into multiple regions or blocks (see figures). A photoresist and mask are used to form the block regions or pixel areas. The substrate is divided up into light transmitting portions, which correspond to the light shielded portions of the mask. Different regions have differing angles and twists. (abstract, figures, col. 2-5, col. 10)
